20 August 2010

Abies amabilis PACIFIC SILVER FIR this evergreen native of NW North America has a regular conic crown with stout shoots bearing dark glossy leaves with silver bands beneath. Grows best in damp acidic soils, will not tolerate lime. Plant in full sun or part shade height at maturity 30 m (90 ft).

Abies koreana KOREAN FIR native of Korea this evergreen is slow growing and flowers at a early age with female flowers being red, green, pink or white whilst the cones are blue. Leaves are pure white beneath. Grows best in areas of high rainfall. Plant in full sun. Height at maturity 10 m (30 ft). Recommended for small gardens.

Abies normandiana ambrol CAUCASIAN FIR this evergreen native of SW Asia is widely used in the Christmas tree trade. Height at maturity 35 m (100 ft) AGM.

Acer bourgeurianum TRIDENT MAPLE native to China this an excellent tree for the small garden with flaky pale orange and brown bark, whilst the delicate 3 lobed leaves turn a brilliant crimson in Autumn. Grows well in a variety of soil types including acid sand, clay. Slow growing. Fully Hardy. Height at maturity 15 m (45 ft).

Acer campestre FIELD MAPLE native of Europe this tree is found growing on limestone and chalk, but will tolerate sandy soils and clay. It is tolerant of pollution and can be planted in cities. Has good autumn colour. Fully hardy. Plant in full sun or partial shade. Height at maturity 15m(45 ft).AGM.

Acer cappadocicum aureum a medium sized tree growing to 50 ft with broad 5 to 7 lobed leaves red when young, turning green in summer and yellow in autumn. AGM.

Acer caudatifolium native to Taiwan this small slender tree, with thin densely packed branches, and white striped bark, long wide leaves almost unlobed. Flowers purplish. Height up to 40 ft. Given the RHS AGM in 1984.

Acer cissifolium native to Japan this trifoliate maple is dioecious with female plants having dense pendulous panicles of yellow flowers. Leaves grey green. Autumn colour red and yellow Growing up to 30 ft.

Acer davidii PERE DAVID'S MAPLE native to China this snake bark maple has green striped bark with white and red. Often grown as a multi-stemmed specimen to enhance this feature. Fully Hardy, fast growing tree growing to 10 m (30 ft) at maturity. Plant in full sun to part shade.

Acer ginnala flame AMUR MAPLE native of Northern China and Mongolia this extremely hardy plant comes into flower with pale yellow scented blooms as the leaves emerge yellowish. By the time the leaves have developed a dark green colour the red tinged samaras hang in bunches. In Autumn the leaves turn a brilliant red. Given the RHS AGM in 1993. Common in cultivation and frequently planted in swathes in parks and public gardens. Rarely a single stemmed tree. Height at maturity 10m (30 ft).

Acer grosseri HER'S MAPLE small deciduous tree native of China. This tree has purplish branchlets and round papery leaflets with 3 to 5 lobes; yellow green flowers produced on slender racemes, whilst yellow brown fruits are borne at right angles in horizontal sprays. One of the snake bark maples it has bright white stripes borne on a green background. Good autumn colour with leaves turning yellow then bright orange or crimson. Height at maturity 11m (35 ft).

Acer henryi native of China this medium sized tree has trifoliate leaves with flowers in slender white spikes. Samaras in drooping white racemes. Deciduous. Growing up to 30ft. Rare in cultivation. A collectors item.

Acer japonicum native of Japanese forests this shrubby tree grows up to 30 ft with wide lobed leaves which turn splendid shades of red, orange and yellow in autumn. Flowers are long drooping corymbs , purplish in colour. **Vitifolium** very similar to the species and difficult to distinguish between some of the other Japanese maple cultivars. AGM.

Acer maximowiczii (syn.nikoense) native of China and Japan, this small deciduous tree , has small triangular leaves with reddish purple branchlets. Yellowy green flowers hang in pendant racemes. Height at maturity 8 m (25 ft).

Acer opalus ITALIAN MAPLE deciduous medium sized tree native to N.Africa. Leaves 5 lobed, lobes rounded green. Flowers in short yellow terminal umbels in spring. Autumn colour golden yellow. Height at maturity 60ft. Although common in collections this tree is rare in gardens and is a collectors item.

Acer palmatum SMOOTH JAPANESE MAPLE native to Japan this small tree has handsome 5-7 lobed delicate leaves which have brilliant colour in autumn, whilst red hanging flowers and fruit provide further interest. There are many varieties of this tree – both cut leaf (dissectum) and purple (atropurpureum) are available. Fully hardy these trees should be planted in partial shade, in a location sheltered from cold winds Height at maturity 10 m.

Japanese Maples in variety

Asahi-zuru (maple of the morning sun) a vase shaped shrubby tree growing up to 30 ft, densely branched with pink and white variegated leaves.

Bloodgood a tree like shrub reaching 30ft or more. Sparsely branched with 5 or 7 lobed palmate leaves with dark wine-red colour turning brilliant red in autumn. Samaras glowing red. An upright rather than spreading shrub. Given AGM in 1993.

Burgundy Lace a spreading shrub growing to 25ft * 25ft. Deeply divided 7 lobed leaves with dissected margins. Dark red in colour. Samaras red. Given AGM in 1993.

Chisio Improved A densely branched shrub growing up to 15 ft with wide 5 lobed leaves unfurling brilliant scarlet turning pinkish and later bluish green with red margins. Requires shelter.

Crimson Queen Good deep red coloured foliage, and carries this colour throughout the growing season. It ages into a beautiful cascading form. It can reach 3 - 4 meters in height. Autumn colour is a spectacular deep crimson. Given AGM in 1993.

Deshojo a shrub growing to 12 ft with thin branchlets and shoots. Leaves wide 5 lobed unfurling brilliant red, later turning dark pink then green. Requires shelter.

Dissectum a mushroom shaped shrub with 7 lobed finely dissected bright green leaves turning yellow in autumn growing up to 13ft. Given AGM in 1984.

Filigree a slow growing mushroom shaped shrub growing up to 6 ft . Leaves are finely dissected, bright green turning yellow in autumn.

Garnet a vigorous shrub growing up to 10 ft * 12 ft. Leaves dissected, dark wine red brightening in autumn. Given AGM in 1993. Suitable for small gardens.

Inabashidare a mushroom shaped shrub with cascading branches growing up to 10 ft and as wide. Leaves dark wine red dissected keeping their colour in to autumn. Given AGM in 1993.

Katsura a tree like shrub growing up to 30 ft, densely branched with wide 5 lobed leaves unfurling orange later turning yellow and finally orange again in autumn. One of the most spectacular Japanese Maples.

Linearlobum a densely branched tree like shrub with very narrow 5 or 7 lobed leaves, bright green colour turning yellow in autumn. Given AGM in 1993.

Nicholsonii a shrubby tree growing up to 15 ft. Leaves large 7 lobed unfurling olive green turning brilliant orange red in autumn.

Orange Dream a densely branched shrub growing up to 25 ft. Leaves golden yellow as unfolding, becoming greenish in summer, turning golden orange in autumn. Suitable for medium sized gardens.

Orangeola a large shrub with cascading branches. Leaves finely divided orange red as unfolding turning brown red or green in summer turning a brilliant orange red in autumn. Leaves persist until mid November so good autumn display. Height 6-8ft spread 3-5ft perhaps taller if staked due to pendulous nature.

Oridonishiki an upright growing shrub growing up to 20 ft. Wide 5 lobed green leaves heavily variegated pink and white.

Ornatum a large mushroom shaped shrub growing up to 10 ft. Leaves are deeply dissected and incised, dark brown as unfolding turning red, orange and yellow in autumn.

Red Pygmy a moderate sized shrub growing to 12 ft * 6 ft. Five lobed linear leaves unfurling dark purple turning greenish brown and finally red in autumn. Given AGM in 1993.

Shiana a dwarf shrub growing to 30 ft * 30 ft . Deeply divided leaves two toned dark red and maroon. Given AGM in 1993.

Trompenburgh a slender upright growing tree with 7 lobed dark shining convex purple leaves. Given preliminary AGM 1984. Grows up to 30ft.

Villa taranto a vase shaped shrub growing up to 12 ft * 12 ft , openly branched. Linear 5 lobed leaves unfurling a dull purple turning dark green followed by golden yellow autumn colour.

Acer palmatum ssp. amoenum a shrub growing to 30ft or more. Leaves wide 7 lobed divided to half the width of the leaf, bright green turning yellow in autumn. Flowers in pendulous racemes reddish white in colour. Native to mountain regions of Japan. Suitable for larger gardens.

Acer palmatum ssp. matsumurae a large shrubby tree with deeply divided fresh green leaves turning yellow in autumn. Native of the forests of Japan. Suitable for medium sized gardens.

Acer pectinatum Alice a shrub growing to 20ft with striped pinkish bark with 3 or 5 lobed green leaves which show white, cream and dark pink variegation during summer. Older plants should be pruned occasionally to maintain this feature.

Acer pensylvanicum MOOSE WOOD MAPLE Small deciduous tree with attractive striped bark and red buds in winter. Large 3 lobed leaves turning butter yellow in autumn. Height at maturity 30 ft. Suitable for small gardens.

Acer platanoides Drumondii a medium sized to large tree, lobed leaves have a broad marginal band of creamy white. Growing to approximately 50ft. Any branches which revert to green should be removed. AGM.

Acer platanoides Royal Red a large handsome tree growing to 60 ft with crimson red leaves. Flowers orange – yellow in colour. AGM

Acer pseudoplatinus Brilliantissimum a small slow growing tree. Leaves are brilliantly coloured golden yellow and salmon pink when unfolding turning yellow green then bright fresh green in summer. Given AGM in 1993. Suitable for small gardens. Eventual height and spread 20ft*25ft. Needs shelter to thrive.

Acer pseudoplatinus Simon-Louis Freres a slow growing tree ultimately reaching 30 ft with 3 lobed leaves unfurling pinkish then developing white and green variegation. **Leopoldii** a large tree with leaves opening pinkish yellow becoming green splashed with yellow and pink. AGM. **Worley** medium sized tree with leaves opening yellow green, turning golden yellow then finally green.AGM.

Acer pseudosieboldianum KOREAN MAPLE a open branched shrub growing to 25 ft and as wide. Large , wide 9 or 11 lobed leaves, margins doubly serrate, green turning orange-yellow in autumn. Flowers are terminal reddish purple appearing before the leaves. Rare in cultivation.

Acer rubrum RED MAPLE native to NE America is so called due to the red flowers which open before the leaves, autumn colouring is spectacular with leaves showing a variety of hues from crimson, orange and yellow eventually turning a brilliant red. This tree is fast growing and should be planted in full sun to partial shade. Tolerant of a wide range of soil conditions including chalk. Height at maturity 20 m (60 ft).

Acer rufinerve a shrubby tree growing to 30ft with green white striped bark with wide 3 or 5 lobed green leaves. One of the most commonly planted of the snake bark maples.AGM

Alnus glutinosa COMMON ALDER native of Europe, W.Asia and N.Africa is a fast growing native tolerant of waterlogged soils this tree makes a useful shelterbelt spp. and can be used to help prevent erosion of river and lake banks. Plant in full sun or part shade. Height at maturity 20 m (60 ft).

Amelanchier canadensis SHADBUSH dense, erect, suckering shrub with mid-green leaves. Racemes of white flowers followed by blue-black fruit. Height 6m. Spread 3m. Flower colour White. Flowers from April to May. Fruit colour Blue, Black. Fruits from June to August. Deciduous. Foliage colour Green.

Amelanchier laevis **Ballerina** a small tree with finely toothed leaves bronze when young and colouring well in autumn.Large trusses of white flowers followed by bluish black fruit.AGM. Ultimate height and spread 6m * 8m.AGM

Amelanchier lamarckii LAMARCK SERVICE BERRY Small hardy tree from Canada with spreading branches and silky bronze coloured new foliage with loose open sprays of white flowers which form when leaves open. Purple black fruit in autumn. Height and spread at maturity 35ft by 30ft. Suitable for smaller gardens. AGM.

Araucaria araucana MONKEY PUZZLE this evergreen native of Chile and Argentina has most unusual whorls of short spiny leaves arranged around the trunk and branches, whilst the later display a unique symmetry. Hardy and tolerant of exposure this tree grows well on any soil. Height at maturity 25m(75 ft).

Aronia melanocarpa BLACK CHOKEBERRY an upright shrub with ovate mid green leaves , turning dark purple red in autumn. White flowers from April to May followed by red berries then black fruit. Deciduous. Growing to 3 to 6ft in height and width. Tolerant of a wide range of soil conditions and pollution. Its tolerance to drought, mine spoils, soil compaction, and salt all make it an ideal plant along roadsides, highways, and parking lots.

Azalea in variety

Antelope – pink with faint yellow blotch, small, scented. 10 per truss.Compact.

Balzac – star shaped nasturtium red with deeper coloured tube.

Berryrose – Salmon pink with yellow blotch, some scent. Autumn colour. Foliage bronze when young.

Cannon's Double – Pale yellow pink with light orange flare fading to cream. Young growth red with good autumn colour

Cecile – salmon pink with yellow flare

Daveisii – pink buds opening white with yellow blotch. Low growing. AGM

Delicatissima – cream tinged pink yellow flare, scented.

Equisiteum – pale pink apricot with orange centre, scented.

Glowing Embers - late flowering with vivid reddish-orange with orange blotch

Golden Eagle – reddish orange with orange yellow mid-rib and vivid orange blotch. Compact habit.

Golden Lights – small pale yellow flowers with orange blotch. Fragrant. Very Hardy.

Home Bush – semi-double deep carmine pink in a ball shaped pompom type truss

Hotspur – orange red with orange flare

Irene Koster – rose pink with deeper markings and yellow flare, sweetly scented.

Jolie Madam – pink with faint orange blotch 7-9 per truss. Upright habit.

Luteum – funnel shaped yellow flowers in trusses of 7-17, spreading and vigorous, good autumn colour

Old Gold – light orange yellow, flushed pink with orange blotch.

Renne – vivid red suffused with yellow

Royal Ruby – deep orange

Soire de Paris – pink with orange throat , lightly scented, 7-9 per truss.

Sunte Nectarine – red buds opening to yellow , flushed deep orange

Vinecourt Troubador – double reddish pink, lightly fragrant

Whitethroat – small, double, pure white funnel shaped. Compact spreading habit AGM

Yellow Cloud – light yellow deepening to brilliant yellow with deep yellow blotch. Upright habit.

Berberis darwinii DARWIN BARBERRY native to Chile and Argentina this evergreen shrub has dark green toothed leaves with spines. Flowers deep yellow or orange in pendulous racemes. Height and spread 10 ft * 10 ft. AGM.

Berberis thunbergii atropurpureum JAPANESE BARBERRY deciduous shrub with compact foliage and rounded shape with purple red stems and leaves. Height and spread 3 ft * 8ft. AGM.

Betula albo-sinensis CHINESE RED BARK BIRCH native of western China this birch has copper coloured peeling bark and tapered glossy leaves turning yellow in autumn. Height at maturity 15m(45 ft). Grows well in full sun and well drained soils. Slow growing. Recommended for small gardens. AGM. **Septentrionalis** medium sized variety with striking grey-pink bark, coppery on the main branches. AGM.

Betula ermanii ERMAN'S BIRCH native of NE Asia and Japan this birch is grown for its attractive white bark which eventually becomes dull pink and covered with

hanging strips of papery bark. It has attractive foliage borne in pairs of 7-11, and deeply marked veins. It also produces numerous catkins which are retained throughout the winter. Grow in full sun in well drained soil. Fast growing. Height at maturity 20 m (60 ft).

Betula mandschurica ssp. japonica (syn. B.platyphyllos japonica)

MANCHURIAN BIRCH native of N.China and Siberia this tree has milky white bark and mid green egg shaped leaves. Height at maturity 70 ft.Spread 30 ft. Hardy.

Betula maximowicziana MONARCH BIRCH this deciduous tree native of Japan has large broad glossy toothed leaves.A pretty tree with rounded crown and grey white or orangey bark and long catkins (4-6 “).Yellow autumn colour. Growing to about 60ft.

Betula papyrifera PAPER BIRCH deciduous birch from N.America has white peeling bark orange brown beneath. Hardy. Tolerant of drought. Casts little shade .Height at maturity 60 ft * 30 ft.

Betula pendula SILVER BIRCH native of Europe and northern Asia this deciduous tree has white peeling bark and graceful pendulous shoots. It grows well on chalk, clay or acid sandy conditions. Plant in full sun to slight shade. Fast growing with a maximum height at maturity of 30m (90 ft). Narrowly conical in shape. Recommended for small gardens.AGM. **Laciniata** a cut leaf cultivar. **Purpurea** with purple leaves and thin pendulous branches. **Tristis** has a narrow conical habit.

Betula pubescens DOWNY BIRCH deciduous native of Europe . Fast growing , useful as shelter belt spp. Closely related to B.pendula it is more tolerant of waterlogged conditions.

Betula utilis HIMALAYAN BIRCH native to the Himalayas and China this tree has decorative pinky orange peeling bark and dark green serrated leaves. Plant in full sun . Hardy. Height at maturity 60 ft. spread 30 ft .

Buddleja davidii BUTTERFLY BUSH native to China this deciduous shrub has a bushy habit with arching stems and fragrant flowers in panicles. Height and spread up to 15ft * 15ft.

Ile de France - profuse panicles up to 28 inches long of dense fragrant flowers in dark violet with yellow eyes.

Pink Delight – Deep pink flowers in summer

Royal Red – purple red flowers

Buddleja Lochinch a hybrid variety with panicles of sweetly scented violet blue flowers with a tiny orange eye. Flowers in summer. Ultimately 9ft*9ft.

Carpinus betulus HORNBEAM native of Europe this is useful as a background tree although it has winter interest, flowers and autumn colour. It is widely used as a hedging specimen and is tolerant of the heaviest clay soils although it will grow in any reasonable soil. Plant in full sun to part shade. Height at maturity 24 m (80 ft). When planted as a hedging use 6 plants per m in 2 staggered rows. AGM.

Caryopteris x cladonensis a hybrid spp with erect stems and downy serrated leaves with flowers in dense cymes deep blue to violet blue in late summer. Height and spread 5ft * 5ft.

Dark Night – a low growing form with dark blue flowers

Worcester Gold – mauve blue flowers

Cedrus atlantica glauca ATLAS CEDAR evergreen native of North Africa this tree is conical when young becoming spreading with age, with blue grey foliage. This tree will grow on a variety of soil types provided they are well drained. Fully Hardy plant in full sun. Height at maturity 30 m (90 ft).

Cedrus deodara DEODAR this evergreen native of the Western Himalayas is an extremely attractive pendulous conifer. The bole should be cleared of branches to 1m above ground by the time the plant is 4m tall to ensure lower branches bow down to the ground. This tree will grow on a variety of soil types provided they are well drained. Fully Hardy plant in full sun. Height at maturity 30 m (90 ft). AGM.

Cedrus libani CEDAR OF LEBANON native evergreen of SW Asia is a magnificent specimen tree which is widely spreading horizontal branches and flattened crown when grown with sufficient space. This tree will grow on a variety of soil types provided they are well drained. Fully Hardy plant in full sun. Height at maturity 30 m (90 ft).AGM.

Cercidiphyllum japonicum KATSURA TREE Native from the Himalayas to Japan this tree displays most unusual foliage borne pendulous branches which look attractive in winter whilst in autumn a wonderful display of yellows pinks and red leaves. Grows on most soils but must be kept moist. Hardy but may be damaged by late frosts. Height at maturity 18 m (60 ft).AGM.

Chaenomeles japonica FLOWERING QUINCE this plant has a open twiggy habit with spiny thorns. Flowers are scarlet with prominent yellow stamens appearing before the foliage in late winter or early spring. Commonly trained against a wall. Fruits can be used to make jelly. Height and spread 3 ft * 6ft.

Chamaecyparis lawsowniana LAWSON CYPRESS evergreen conifer with green foliage generally used for hedging. Variety **Ellwoodii** has steel blue grey foliage. Growing up to 15ft*4ft.

Chamaecyparis pisifera Boulevard growing to 30 ft this evergreen conifer has blue green foliage. Good rockery specimen.

Chimonanthus praecox JAPANESE ALLSPICE native to China this deciduous shrub has glossy dark green lance shaped leaves turning pale yellow in autumn with fragrant yellow flowers on second year bare wood in spring. Height and spread at maturity 12 ft * 10ft.

Choisya ternata an evergreen shrub from Mexico with glossy 3 lobed leaves and white, fragrant star shaped clusters of flowers in Spring. Prefers moist well drained

soil with shelter and slight shade. In colder regions dieback of young growths may occur but will readily re grow in established plants. **Goldfingers** has pale golden yellow foliage which ages to deep green. Growing to 6ft * 6ft.

Cornus alba sibirica RED BARK DOGWOOD deciduous spreading shrub with bright red stems in winter. Leaves turning orange and red in autumn. Forms thickets, Height and spread 10ft * 10ft. AGM.

Cornus alternifolia argentea PAGODA DOGWOOD native of E.USA this deciduous shrub or small tree has branches in irregular whorls leading to a tiered horizontal layers of leaves and cream star like flowers in summer followed by small black fruits. This cultivar has white variegations in the leaves which turn a deep purple red in autumn. Grows to 20ft * 20ft.

Cornus controversa GIANT DOGWOOD this deciduous tree from China and Japan has horizontal spreading branches in tiers with white upturned flowers. Leaves are oval and glossy turning red and purple in autumn. Fruits black. Height and spread at maturity 60 ft * 50 ft. Cultivar **variagata** has drooping leaves streaked with white margins.AGM.

Cornus florida Cherokee Chief FLOWERING DOGWOOD native of N.E.USA is a highly ornamental spreading tree with dark green pointed leaves which turn all shades of orange, red, yellow and purple in autumn. The small inconspicuous green flowers are surrounded by large dark red rose bracts in early summer. Grows to 30ft*25ft.

Cornus kousa CHINESE DOGWOOD a small deciduous tree with glossy, wavy edged leaves turning bronze and crimson in autumn. Abundant green flowers in summer with large white bracts Pink or red fruits. Not suited to chalk soils. Height and spread at maturity 25 ft * 15 ft. Suitable for medium sized gardens.**China Girl** pure brilliant white. **Chinensis** has smoother pale leaves.AGM. **Norman Haddon** beautiful tree with a spreading habit. In summer the bracts open creamy-white before developing pink tones. **Satomi** masses of salmon-pink flowers in spring.

Cornus sanguinea Mid Winter Fire native of N.Europe this deciduous shrub has brilliant red stems in winter, whilst they bear loose clusters of white flowers followed by black fruits, whilst leaves turn a brilliant red in autumn. Grows to 15ft * 10ft.

Corylus avellana Red Majestic is a deciduous striking red form of the contorted hazel. Planted in a moist, well drained soil in sun or semi shade it will grow to 2.5m and is eminently suitable for smaller gardens. red nuts and red catkins.

Cotinus coggygria SMOKE BUSH a rounded bush with green oval leaves turning scarlet in autumn. Numerous plume like panicles of bronze pink flowers in summer. Height and spread at maturity 15ft * 15ft. Plant in well drained soil in a sunny position.AGM.

Cotoneaster horizontalis ROCK COTONEASTER from China this spreading deciduous shrub has small glossy elliptical leaves which colour well in autumn. Pink

flowers in spring, which are followed by persistent red berries in autumn. Height and spread 3ft * 5ft.AGM.

Cotoneaster integerrimus a dwarf mound forming evergreen with small glossy dark green leaves, small white flowers are followed by large red fruits.AGM. Grows to about 6ft.

Cotoneaster lacteus syn C.parneyi native to China this evergreen or semi evergreen shrub has small deep green leaves with creamy white flowers in summer and persistent red berries in winter. Fully hardy. Plant in full sun. Height and spread at maturity 12 ft by 12 ft.AGM.

Crataegus laevigata Paul's Scarlet thorny tree with glossy green leaves this cultivar is grown as a specimen tree for it's deep pink double flowers in spring followed by red fruits. Height at maturity 25 ft. AGM. **Rosa Plena** an attractive form with double pink flowers.AGM.

Daphne mezereum An attractive shrub grown for it's pink , purple fragrant flowers which are borne in clusters or singly along bare stems in winter followed by an impressive display of red berries in summer. Plant in good moist soil in semi shade, sheltered position. Ultimate height 4 ft.

Daphne tangutica native to China this evergreen shrub has dense clusters of small fragrant purple flowers in spring-summer and small fruits. Height and spread at maturity 6ft * 6ft. AGM.

Davidia involucrata HANKERCHIEF TREE native to China is a specimen tree grown for the unusual bracts which develop around it,s small inconspicuous flower in spring. At first yellow becoming white the hanging bracts give the tree it's common name. Will tolerate sandy and alkaline soils provided not allowed to dry out. Much prefers deep moist soils. Plant in full sun or part shade. Ultimate height 20 m (60 ft) AGM.

Deutzia hybrid strawberry fields compact shrub with beautiful, fragrant, crimson blooms, soft pink flushed within. Suitable for borders. Grows up to 1 ½ ft.

Dipelta floribunda native of China this shrub has long arching branches which bear clusters of fragrant tubular bell shaped white flowers flushed pink, yellow or orange in spring..Height and spread 8ft * 10ft.

Eleagnus commutata SILVER BERRY this shrub native of North America has red-brown shoots with silvery leaves, with fragrant flowers, silver outside yellow within from Spring to early Summer. Silvery fruit in Autumn. Height and spread at maturity 8ft by 15 ft. Plant in full sun.

Enkianthus campanulatus REDVEIN ENKIANTHUS native to Japan this deciduous shrub has whorled branches of dull green elliptic leaves turning red in autumn, with spectacular drooping racemes of creamy white bells veined red or pink in late spring or early summer. Plant in full sun or part shade in deep moist acid or neutral soil. Height and spread at maturity 15ft by 15ft. AGM.

Eucalyptus coccifera TASMANIAN SNOW GUM this eucalypt with peeling grey and white bark revealing yellow or pink fresh bark beneath. Adult leaves are grey-green lance shaped with creamy white flowers in summer. Height and spread at maturity 80 ft * 10 ft. Evergreen.AGM.

Eucalyptus gunnii CIDER GUM native of Tasmania this is the standard eucalypt of suburban gardens.A hardy evergreen with blue green round paired leaves ultimately becoming alternate elliptical leaves on yellow petioles. Plant in full sun or slight shade. Height at maturity 25m (75 ft).AGM.

Eucalyptus moorei nana NARROW LEAVED SALLY This species is a mallee type with multiple stems reaching 7 to 10' in height. Small pointed leaves are green on both sides. An excellent specimen for small gardens in frosty areas – bark smooth grey to white.

Eucalyptus pauciflora subsp. niphophila SNOW GUM native of Tasmania this is the hardiest of all the eucalypts and unlike other eucalyptus has no distinct juvenile foliage just the adult grey-green with blue white shoots, whilst the bark is a beautiful “snakeskin” of grey, blue-grey and cream. Plant in full sun or partial shade. Height at maturity 15m (45 ft).AGM.

Eucalyptus parvifolia SMALL LEAVED GUM from New South Wales Aus. Is a small bushy tree growing to 20 ft. Small inflorescences of white flowers in summer. Bark peeling in strips to reveal smooth pinkish bark beneath. Plant in full sun. Hardy.

Eucalyptus periniana SPINNING GUM a small tree with peeling bark to reveal smooth creamy blotched bark beneath with profuse creamy white flowers in summer. Juvenile foliage in cut flowers arrangements. Height and spread at maturity 40 ft * 15 ft. Plant in full sun. Hardy.

Eucalyptus viminalis MANNA GUM an erect open tree with rough grey bark below and smooth yellowish bark above which shreds into ribbons during summer. Juvenile leaves are short lance shaped whilst adult leaves are up to 8” long and lance shaped. Produces umbels of white flowers from summer to autumn. Height and spread 30-160ft:25-50ft.

Euonymus europaeus SPINDLE TREE A familiar native hedgerow shrub with green stems producing an abundance of scarlet capsules in the autumn. Height 6m. Spread 2.5m. Flower colour Green, White. Flowers from April to June. Fruit colour Scarlet. Fruits from September Deciduous. Foliage colour Green. Hardy.

Exochorda x micrantha **The Bride** a compact shrub growing up to 6 ft tall with a slightly weeping habit and arching branches covered with large white flowers in spring.AGM.

Fagus sylvatica COMMON BEECH native of Europe, deciduous this tree has wide scale amenity use making large trees with bright green foliage and attractive smooth boles. Being native is good for wild life. Commonly also used as a hedging plant and

good shelter as retain senescent leaves during winter. Tolerant of most soils except for water logged or poorly draining soils. Height at maturity 35m (120 ft)AGM.

Asplenifolia – narrow long pointed leaves, deeply incised. AGM.

Fagus sylvatica atropurpureum COPPER BEECH a variant of the native beech the purple beeches which are grown by seed show a considerable variation in their colour. They are of a similar size and grow in similar conditions to green beech.

Fraxinus angustifolia subsp. oxycarpa CAUCASIAN ASH this fast growing deciduous native of S.Europe and N.Africa has slender glossy drooping leaflets of 5-7, with smooth bark. Height at maturity 25m (75 ft).Prefers a well drained soil in full sun including alkaline soils.

Ginkgo biloba MAIDENHAIR TREE native of China this deciduous conifer is the sole survivor of a family of plants which dominated tree life 200 million years ago. This ancient ancestry is reflected in the thick leathery leaves which have a fan shaped system of veins, which evolved before the pinnate branching system of veins seen in most trees and shrubs. The leaves turn a bright golden colour in autumn. It is extremely hardy, thrives on both acid and alkaline soils and is tolerant of air pollution. Slow growing, narrow. Height at maturity 25 m (75 ft).AGM.

Gleditsia triacanthos HONEY LOCUST native of North America is widely planted as a street tree and is tolerant of both the poorest soils and atmospheric pollution. The leaves are compound and consist of tiny bright green leaflets. Prefers a well drained soil in a hot sunny location. Fast growing. Height at maturity 25 m (75 ft).

Halesia carolina SNOWDROP TREE from Carolina USA. This small deciduous tree has a spreading crown with foliage turning yellow in autumn. Flowers profusely with clusters of white or pinkish bells, which form 4 winged fruit in autumn. Plant in well drained slightly acidic soil. Plant in full sun or part shade. Protect from strong winds. Height and spread at maturity 40ft by 25 ft.

Hamamelis mollis CHINESE WITCH HAZEL native of China these deciduous woodland shrubs prefer moist cool soils with dappled shade and are grown for their clusters of golden yellow petals in late winter or early spring before the leaves emerge. Good autumn colour. Grows to 15ft *15ft.

Hamamelis vernalis Sandra OZARK WITCH HAZEL as with other Hazels these deciduous shrubs are grown for their yellow winter flowers, whilst this cultivar has large leaves which colour a spectacular red and purple in autumn. Grows to approximately 15ft.

Hydrangea arborescens radiata SMOOTH HYDRANGEA native of North America this deciduous open shrub has flat creamy white flower heads in summer. Good autumn colour. Prefers moist shaded site. Height and spread 8ft * 8ft.

Hydrangea quercifolia OAK LEAFED HYDRANGEA this deciduous shrub from southern USA has large lobed green leaves turning crimson in autumn, whilst white

panicles of flowers form in summer, turning pinkish hues in autumn. Plant in full sun or part shade. Height and spread at maturity 8ft by 8ft.

Ilex altclarensis Golden King a hybrid holly with larger less spiny dark green leaves edged yellow. More tolerant of Maritime conditions and air pollution than common Holly they also make excellent hedging specimens. Can grow up to 70 ft * 20ft left unclipped.

Ilex aquifolium COMMON HOLLY native of Europe, N.Africa and W.Asia this evergreen when grown in the open forms a tall spired tree and provided male trees are in the proximity females can bear heavy crops of bright red berries. Plant in full sun or part shade. Tolerant of all soils except waterlogged ones it is useful for hedging, shelter belts and as a specimen tree. Height at maturity 20 m (60 ft).AGM.

Juglans nigra BLACK WALNUT native of the Eastern USA this tree has dark brown deeply fissured bark and luxuriant leaves which hang in groups of leaflets of about 15. The leaves turn a bright yellow in Autumn before falling. Fast growing this tree should be planted as a young specimen in full sun to part shade, soil deep and moist. Height at maturity 25 m (75 ft).AGM.

Juniperus Holger new growth in spring is frosted with gold; blue-green summer color; blue-gray in winter. Evergreen growing to 4ft * 4ft.

Juniperus davurica expansa variegata a dwarf evergreen spreading shrub with flecks of yellow sprays. A dwarf spreading shrub ultimately reaching a height of 3ft in the centre.

Juniperus squamata Blue Alps striking steel blue foliage and strong growth growing to an ultimate 20ft * 15ft.

Kalmia L Richard Jaynes Intense red buds open up to large chiffon pink flowers. Profusely flowering. Evergreen. Height and spread 4ft * 4ft.

Kalmia Sarah Vivid red buds open to bright pinkish-red flowers. 'Sarah' is the closest to pure red Mountain Laurel. Compact habit. Evergreen. Growing to 2-3 ft.

Kalmia L myrtifolia pale pink blooms.growing to 3ft *3ft.

Koelreutaria paniculata GOLDEN RAIN TREE native of China and Korea, this deciduous tree of spreading habit, has leaves emerging bronze-red, turning green then orange or yellow in autumn. Large clusters of yellow flowers opening in summer, turn green or pink and ultimately form brown lantern like fruits. Tolerant of most soils inc. dry ones. Must be planted in full sun. Height at maturity 12m (36 ft). Recommended for medium sized gardens.AGM.

Kolkwitzia amabilis BEAUTY BUSH a bushy deciduous shrub with long upright or arching shoots. Corymbs of bell shaped flowers white to pink with yellow markings in the throat, from late spring to early summer. Prefers full sun in well drained fertile soil. Height and spread at maturity 12ft * 12ft.

Lagerstroemia indica INDIAN LILAC of oriental origin has lilac pink flowers in autumn. Plant should be grown in protected position, with last years growth being cut back to ground level in spring to produce vigorous fresh growth for flowering later in the year. Hardy to –15 C. Plant in full sun. Well drained soil. Height 3-6 ft.

Larix decidua EUROPEAN LARCH a large coniferous tree with soft pale green needle-like leaves, cones produced in spring. Height 30m. Spread 4-6m. Deciduous. Foliage colour Green. Hardy.

Larix eurolepsis HYBRID LARCH of cultivated origin this hybrid of the Japanese and European Larches is extremely hardy and tolerant of poor soil conditions. They are extremely fast growing and should be planted as young plants. Bears cones from an early age. Deciduous conifer turning vibrant yellow in autumn. Height at maturity 35m(105 ft).

Laurus nobilis BAY LAUREL – The sweet bay introduced to Britain by the Romans. It is an evergreen with dark green glossy leaves used in cookery. It can stand training and heavy clipping and is often kept container grown as it is susceptible to frost. Left untrained can reach a height of 20 m (60 ft). Grows well in full sun or shade.AGM.

Leucothoe Scarletta broad-leaved evergreen outstanding for exceptional hardiness and graceful, truly dwarf habit. New foliage, produced throughout the season, is bright red and turns a deep, lustrous green with maturity- and then again in fall to a rich, winter-long burgundy. Eventual height 4ft and spread 8ft. **Zebliid** a new variety which exhibits a highly attractive leaf coloration as well as outstanding tolerance to shade, very hardy.

Leycesteria formosa PHEASANT BERRY / HIMALAYAN HONEYSUCKLE native to the Himalayas and western China this shrub has whitish flowers with red bracts on pendant spikes in summer or autumn. Fruit ripen deep purple to black. Plant in full sun or part shade. Height and spread 6 ft. Cultivar **Notbruce** has yellower leaves.

Libocedrus decurrens INCENSE CEDAR this evergreen from western N.America grows with branchlets arranged in flat sprays of scale like leaves making a bright green columnar tree. Can be used for hedging but slow growing. Ultimate height at 60 yrs 40m (120 ft).

Ligustrum lucidum GLOSSY PRIVET from China this large evergreen shrub has long pointed shiny evergreen leaves with large panicles of white flowers in autumn. Height and spread at maturity 30ft * 30 ft. AGM.

Ligustrum vulgare COMMON PRIVET well known hedging plant.

Lonicera nitida BOX HONEYSUCKLE widely grown shrubby evergreen with small dark green leaves, small cream flowers in spring and purple black berries. Dense bushy habit, responds well to pruning.12 ft*10ft.

Liriodendron tulipifera TULIP TREE a fast growing tree native of North America with unusual 3 lobed leaves turning butter yellow in autumn. Grow well in moist fertile soil. Ultimate height and spread 100ft*40ft.

Magnolia loeb. Leonard Mesel a hybrid magnolia this spreading tree has deep rose lilac buds with pink narrow petalled flowers white inside which appear before the foliage. Growing to 30ft * 20ft.

Magnolia x soulangiana TULIP MAGNOLIA this hybrid forms a low branched tree or shrub with dark glossy leaves. Large saucer like flowers appear before foliage. **Satisfaction** has pink flowers. **Sundew** has creamy flowers flushed pink at the base flowers. Grow to approximately 20ft*20ft.

Magnolia stellata Rosea growing to 15ft * 10 ft this deciduous magnolia from Japan has oval dark green leaves with clusters of large simple flowers with pale pink flowers in late winter before the foliage emerges. **Royal Star** has abundant double, snow white flowers.

Mahonia aquifolium OREGON GRAPE native to W N.America this evergreen shrub has dark shiny holly like leaves borne as paired leaflets turning purple in autumn and dense clusters of yellow flowers in winter or early spring. Hardy. Height and spread 3ft * 2 ft after 5 yrs. Prefer drier soils in a sunny position.

Mahonia japonica a spreading shrub native to Japan with long leathery leaves with 19 spiny dark green leaflets. Fragrant bright yellow flowers are held in upright racemes in late winter. Blue black berries. Height and spread at maturity 6 ft * 10 ft.AGM.

Mespilus germanicus MEDLAR a large shrub or small tree with dull green leaves turning red or yellow in autumn. Profuse apple blossom like white flowers appearing in spring. Height and spread at maturity 20ft * 25ft.

Metasequoia glyptostroboides DAWN REDWOOD native of China this deciduous conifer was rediscovered in 1941 in a Chinese monastery, it had been thought to be extinct 200 million years. They will grow well on most soils but prefer areas of high rainfall. Plant in full sun with some shelter. Height at maturity 30m (90 ft).AGM.

Mitraria coccinea a scrambling shrub growing up to 6m from south America has small toothed evergreen leaves with orange tubular flowers followed by berries. **Lake puyehue** large orange-scarlet tubular flowers from late spring through summer

Nandina domestica nana HEAVENLY BAMBOO is a rounded dwarf evergreen shrub with lance shaped leaves which are crimson, purple and orange throughout the year colouring more intensely in winter. Bright red berries in autumn. As plants are either male or female plantings should be done in small groupings to ensure cross pollination. Height and spread at maturity 7ft * 4ft. Prefers a rich moist well drained soil.

Nothofagus obliqua ROBLE BEECH native of Chile and Argentina has attractive dark green leaves in summer turning yellow, crimson and orange in autumn. They are extremely fast growing. Plant in full sun or part shade. Height at maturity 30m (90 ft).

Nyssa sinensis CHINESE TUPELO a magnificent large shrub or small tree native of China, grown for it's spectacular autumn colour of varying shades of red. Prefers a deep moist acid soil. Growing up to 30ft in height. AGM

Nyssa sylvatica BLACK TUPELO native of NE America this tree is grown for it's splendid autumn colour when it's leaves turn gold through to orange to scarlet. Best cultivated in a deep moist acid soil. Plant in full sun or part shade. Height at maturity 20 m (60ft). AGM.

Paeonia delavayi MAROON TREE PEONY this deciduous shrub from China has large dark green deeply cut leaves, with large saucer shaped red flowers with golden yellow anthers. Prefer deep fertile soils with shelter and some protection from frosts. Height and spread at maturity 7ft * 5ft.

Parthenocissus tricuspidata BOSTON IVY this vigorous deciduous climber has deep green maple like leaves turning a brilliant scarlet in autumn. Clusters of yellow green flowers form in summer followed by dark blue fruit. AGM.

Paulownia imperialis(syn Tomentosa) FOXGLOVE TREE native of east asia is a medium sized deciduous tree with large handsome juvenile foliage turning yellow or brown in autumn. Large upright terminal panicles of pink lilac flowers 50-60 flowers in each panicle. Prefer deep moist well drained soils with shelter especially whilst young. Hardy. Height and spread at maturity 50 ft * 30 ft. AGM

Pieris japonica **Mountain Fire** growing to 8ft * 8ft and preferring moist cool soils and preferably light shade, this cultivar has bright red new leaves aging to deep green whilst flowers are borne in drooping racemes of bell shaped white flowers.

Philadelphus MOCK ORANGE deciduous shrubs grown for scented double or single flowers, they grow well in full sun or part shade but flower better when grown in full sun. Prefer fertile free draining soil. Height and spread at maturity 5ft *6ft.

Belle etoile – white with purple red central splash with sweet pineapple like fragrance. AGM

Manteau d'Hermine – creamy double flowers in summer only grows to 2-3 ft. AGM

Schneersturm – pure white double flowers

Picea jezoensis HONDO SPRUCE native of Japan this evergreen, hardy spruce is a broadly conical with attractive foliage bluish white beneath and white shoots turning creamy. Plant in full sun or part shade. Prefers areas of high rainfall. Height at maturity 30 m (90 ft).

Picea omorika SERBIAN SPRUCE native of Bosnia and Serbia this evergreen is extremely decorative with bright fresh green new foliage contrasting with the older

deep green leaves. It forms a compact spire with spread of 4m (12 ft) and ultimate height of 30 m (90 ft). A useful town tree, casting little shade. Grows fast on all soil types. Prefers areas of high rainfall.AGM.

Picea orientalis ORIENTAL SPRUCE native of N.Turkey and Caucasus is a slender columnar evergreen with dark glossy needles, branches arranged in pendulous whorls decreasing in size as they rise to create a spire. They are hardy fast growing trees making a fine specimen tree some 30m (90ft) at maturity. Can be used as a Christmas tree. Plant in full sun or part shade. Prefers areas of high rainfall and do not tolerate dry alkaline soils.AGM.

Picea pungens glauca COLORADO BLUE SPRUCE this evergreen conifer has stout shoots densely covered in sharp bright silvery blue needles. Narrow and columnar in shape. Grow in lime free soil. Hardy. Height at maturity 10 m (30 ft). Suitable for small gardens.

Platanus x acerifolia LONDON PLANE this deciduous tree of cultivated origin with many lobed shiny leaves. Tolerant of atmospheric pollution, often planted as a city tree. Prefers areas with hot summers, both acid and alkaline soils. Fast growing, hardy. Height at maturity 40 m (120 ft).AGM.

Populus alba WHITE POPLAR a vigorous tree with hairy young stems and leaves. Leaves dull green silver beneath. Height and spread at maturity 80 ft * 40 ft.

Populus tremula ASPEN a forest tree with a high sparse crown, and smooth greenish grey bark. Catkins form in May. A pioneer tree this tree requires full sun. The leaf stalks are flattened causing the slightest breeze to flutter the leaves. Good red autumn colour. Tolerant of poor soils. Height at maturity 30 m (90 ft).

Potentilla fruticosa POTENTILLA a dense shrub flowering in summer or autumn. Small palmate leaves with 5/7 leaflets. Flowers borne as small single roses. Height and spread at maturity 5ft *5ft.

Goldfinger – dwarf compact shrub with an abundance of rich yellow flowers. AGM.

Tangerine – dwarf spreading shrub orange yellow flowers.AGM.

Primula bulleyana PRIMULA perennial woodland plant preferring dappled shade and moist soils. Native to China flower stems have up to 7 whorls of golden yellow to orange flowers in late spring or early summer.

Primula japonica a clump forming plant native to Japan. Flower stems bear up to 6 whorls of white , pink magenta to red flowers in late spring or early summer.

Primula viallii native of western China has a strong flower stem with cylindrical heads of small purple pink flowers topped with a cap of overlapping red buds.

Prunus avium BIRD CHERRY / GEAN this deciduous cherry from Europe and W.Asia grows on almost all soil types inc. chalk, flowers prolifically in spring followed by a good show of autumn colour. Tolerant of shade and full sun. Fast growing and

hardy. Height at maturity 20 m (60 ft). **Plena** masses of drooping white double flowers.

Prunus x blireana a large shrub or small tree with coppery purple leaves and fragrant rose pink double flowers opening before leaves in mid spring. Growing to 16ft * 16ft. Suited to smaller gardens.

Prunus cerasifera CHERRY PLUM of unknown origin this flowering cherry produces prolific white flowers on bare stems in early spring. Hardy and fast growing reaching an ultimate height of 10 m (30 ft), this tree is suitable for medium sized gardens. Plant in full sun or part shade. Grow well on any good reasonably well drained soil. Good hedging specimen. Cultivar **nigra** has deep purple foliage and small pink flowers.AGM.

Prunus laurocerasus CHERRY LAUREL popular evergreen hedging plant growing up to 20ft. Racemes of creamy white flowers in spring followed by small black fruits.

Prunus serrula tibetica BIRCH BARK CHERRY small willow like leaves with small white flowers followed by small cherry like fruits. Grown for it's attractive peeling mahogany bark. Growing to approximately 25ft *25ft.

Prunus serrulata **Shimidsu** JAPANESE FLOWERING CHERRY a small deciduous tree with long elliptical pointed leaves and masses of double pale pink leaves in spring. Only grows to 12ft * 15ft. **Shirofugen** a Japanese flowering cherry, semi-double and double flowers, tend to retain blossoms longer. Flowers double, deep pink at first, fading to pale pink.AGM. Height and spread 25ft *25ft.

Prunus x subhirtella pendula ROSE BUD CHERRY native of Japan this deciduous tree produces a mass of tiny single white flowers in April. Hardy and tolerant of full shade grows well on any reasonably well drained soil. Shoots pendulous. Height at maturity 6m (18 ft).

Prunus tomentosa NANKING, DOWNY CHERRY native to the Himalayas this shrub has deep green leaves this cherry has clusters of white/pinkish flowers carried singly or in pairs followed by downy red fruit. Height and spread at maturity 8ft*8ft.

Prunus yedoensis YOSHINO CHERRY this hybrid tree is an upright tree with spreading crown with deep green serrated leaves turning vivid orange red in autumn. Racemes of small white scented flowers in spring.AGM. **lvensii** weeping branches and profuse snow white flowers.

Pterocarya fraxinifolia CAUCASIAN WING NUT this deciduous tree from N.Iran is a fast growing foliage tree with large bright green compound leaves composed of 21 overlapping leaflets. Produces catkins in summer, whilst leaves turn bright yellow in Autumn. Grows best in moist fertile soil, plant in full sun or part shade. Height at maturity 25m (75 ft).AGM.

Pterostyrax hispida EPAULETTE TREE this hardy deciduous tree native of China and Japan has large finely serrated leaves and panicles of fragrant white flowers in

summer, followed by small green fruit. Plant in full sun. Height and spread at maturity 25ft by 20 ft. Suitable for small gardens.AGM.

Pyrus salicifolia pendula a small tree with pendulous habit with narrow willow like leaves, silvery when young turning greyish green with age. Small creamy white flowers. Growing to around 20ft * 10ft.

Quercus mysinifolia (syn glauca) BAMBOO OAK native of China and Japan this small graceful evergreen, with light airy crown, with dark green tapered leaves makes a useful foliage specimen. Hardy but may require some protection in colder areas. Height at maturity 10m (30 ft).Recommended for small gardens.

Quercus rubra RED OAK native of E. N.America grows well on all soils inc. light sandy ones, tolerant of air pollution. It has a short straight clean bole with regular spacing of branches to form a dome. Brilliant autumn colour of bright red when young, whilst yellow, brown on older trees. Fast growing. Hardy. Plant in full sun or part shade. Height at maturity 30 m (90 ft).AGM.

Rhododendrons in variety

Anna Baldseifen - pretty pink and white flowers.Dwarf Rhodo.

Bergie Larson – a dwarf evergreen with red buds opening into trusses of 12 with orange-yellow inside

Betty Womald – a medium sized evergreen shrub with pink with light purple blotch in large conical trusses

Blue Peter – evergreen shrub with large leaves. Clusters of funnel shaped, lavender blue flowers with frilled petals and purple marks in throat from May to June. AGM.

Bruce Brechtbill – a low growing evergreen with glossy elliptical leaves with open pale pink funnel shaped trusses borne in ball shaped trusses

Carmen – a dwarf evergreen with waxy campanulate dark red flowers borne in loose trusses of 2-5

Chikor – a dwarf evergreen with small dark leaves, bronze tinted in winter. Clusters of pretty clear yellow flowers in mid spring. Height and spread 2ft. Flowers from April to May.

Clipinense – a compact evergreen shrub. Clusters of funnel shaped pale to mid pink flowers in early spring. Height and spread 3ft *3ft. Flowering March to April. AGM.

Crane – a semi dwarf evergreen with yellow buds opening a creamy yellow in trusses of 3

Curlew – a dwarf evergreen shrub with small dark leaves. Clusters of bright yellow flowers spotted greenish brown inside the throat. Height and spread 2ft. Flowering from April to May. AGM,

Dormouse – a semi dwarf evergreen with campanulate delicate pink flowers held in loose trusses

Egret – a dwarf rhododendron with small white bell like flowers in loose trusses of 2-6. Leaves small dark and shiny. AGM.

El camino – a tall evergreen with open funnel shaped pinkish red flowers with red blotch in a rounded truss

Fabia - a medium sized evergreen shrub with salmon orange flowers in loose trusses of 7-10

Fastuosum Flore Pleno – a tall evergreen shrub with double flowered lavender blue flowers with darker spotting borne in open trusses of 15-17

Furnivals Daugther – an upright evergreen shrub with clusters of funnel shaped, bright pink flowers, with a dark speckled mark in the throat in late spring and early summer. Height and spread 9ft * 9ft. AGM.

Garden Director Glocker – a compact, small, domed evergreen shrub, with deep rose red funnel shaped flowers in loose trusses from April to May.

Golden Gate – a compact semi dwarf rhododendron with star shaped reddish pink flowers, with orange edges and golden yellow throat.

Goldkrone – intense golden yellow flowers lightly spotted ruby red

Gomer waterer – a compact evergreen shrub with clusters of white flowers opening from lilac pink buds flushed mauve-pink at the margins and a bold yellow flare in the throat in late spring. Flowers from May to June. AGM.

Grace Seabrook – an evergreen shrub with deep blood red flowers paling towards the margins. Flowers from March to May.

Gristede – a dwarf rhododendron with funnel shaped violet blue flowers. Flowering from March to April.

Horizon Monarch – a tall evergreen with open shaped yellow flowers and small vivid flare

Hotei – a dense evergreen shrub with clusters of deep yellow flowers from April to May. Height and spread 6ft * 6ft. AGM.

Impeditum - blue flowers and small grey-green leaves. Very compact. Excellent plant for the rock garden. Height and spread 1ft*1ft.

Impeditum Blue Steel – blue flowers, blue-steel leaves. Alpine

Impeditum Indigo – deep purple flowers

Jean M de Montague – a medium sized shrub with frilly edged crimson flowers in round trusses of up to 14 flowers

Lem's Monarch – a large evergreen shrub, flowers are pale pink fading to white edged with pink in large conical trusses. AGM.

Linda – open rose pink flowers in upright trusses of 7-8. Dense rounded habit, low growing.

Loch Rannoch – a compact free flowering shrub with yellow flowers with red throat in lax trusses of 11-17

Lord Roberts – evergreen shrub with clusters of funnel shaped, dark crimson flowers with dark markings inside the throat from may to june. Height and spread 6ft * 5ft.
